DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Stanley (U.S Patent No. 4,205,785).

Stanley discloses a children water toy comprising a base unit with an elbow portion, a nozzle portion 28 for directing a fluid in a vertical direction, a spraying unit 14 for receiving fluid from the base, and a cone 25.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stanley in view of Kessler (U.S Patent No. 5,224,652).

Stanley teaches all the limitations of the claims except for a stake portion and a collar portion. However, Kessler discloses a spraying device with a stake 22 for holding the spray device at a fixed location, and a collar 18. Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Stanley with

a stake portion and a collar portion as suggested by Kessler. Doing so would provide a way to fix a spraying device in place.

5. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stanley in view of Ishikawa (U.S. Patent No. 1,854,613).

Stanley teaches all the limitations of the claims except for a hoop portion. However, Ishikawa discloses a spraying device with a hoop portion¹⁵ with a two-way connector for spraying fluid. Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Stanley with a hop portion as suggested by Ishikawa. Doing so would provide a way to maintain spraying around the hoop (figure 1).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect a water-spraying toy: Washburn, Neveling, Kubiawicz.
